THE BUILDING BLOCKS FOR MASSIVE MUSCLE

The very latest innovation from Team MuscleTech™ headquarters has created the most hardcore musclebuilding micronutrient multivitamin complex in the world! Be the first to read about *Anabolic VITAKIC™*!

Building massive amounts of muscle is in many ways like constructing a house. It all starts with a proper foundation. If you really want to pack slabs of granite-hard muscle onto your frame, all of your nutrient bases need to be covered. Obviously this means consuming large amounts of ultra-high-quality protein along with key carbohydrates and essential fats. But just as importantly, laying the proper foundation starts with using an advanced micronutrient multivitamin complex. Countless bodybuilders have overlooked the critical importance of this for anabolism and muscle growth. However,

thanks to the latest innovation straight from Team MuscleTech headquarters, a new breed of musclebuilder is born. This state-of-the-art complex not only addresses bodybuilders' micronutrient needs, but also includes an advanced musclebuilding component that targets intramuscular processes that initiate rapid muscle growth! This formula is so bleeding-edge that it's protected by seven U.S. patents and utilizes a pharmaceutically inspired delivery technology. Employing this novel technology and rapidly delivering powerful musclebuilding effects, *Anabolic VITAKIC* – the World's Most Hardcore Musclebuilding Micronutrient Multivitamin Complex – is finally here!

As a hardcore bodybuilder, you do everything that you possibly can to maximize muscle growth every day. You pound back tons of protein and organize your day around balls-to-the-wall training sessions. So why then are your muscles not growing as fast as they should? The answer is this: your body's biochemical and intramuscular mechanisms aren't being maximized. But, Team MuscleTech™ researchers have set out to solve that

researched ingredient into each dosage of *Anabolic VITAKIC* to help maximize muscle growth and strength.

Industry-leading supplement researchers from Team MuscleTech have known the amazing muscle-building benefits of *Anabolic VITAKIC*'s key musclebuilding compound for years. And they've spent years of exhaustive collaborative research behind the secured walls of Team MuscleTech headquarters methodi-

change the face of the bodybuilding industry forever!

Diverse in chemical structure and function, micronutrients are essential dietary elements that are required by the body for optimal function and performance. Of course, Team MuscleTech researchers knew this. The result of their painstaking efforts is the creation of the world's most hardcore musclebuilding micronutrient multivitamin complex

– *Anabolic VITAKIC*! This groundbreaking formula is engineered with a potent combination of over 100 micronutrients, powerful antioxidants, amino acids, coenzymes, trace elements and essential vitamins and minerals. It's also supercharged with a key musclebuilding agent that serves to promote muscle growth by influencing intramuscular processes that radically optimize muscle cell recovery and accelerate protein synthesis. With this new supplement breakthrough, Team MuscleTech researchers have once again forced the science of musclebuilding to be re-written.

Why *Anabolic VITAKIC* Kicks the Hell Out of Mass-Market Multivitamins

What makes the *Anabolic VITAKIC* formula so effective is its key anabolically charged musclebuilding compound. Industry-leading Team MuscleTech scientists knew how effective this key ingredient was for building muscle. This component actually targets intramuscular processes to quickly drive up muscle growth and strength! That's right! Not only will your specific micronutrient needs be covered, but *Anabolic VITAKIC* forces you to build more muscle, in a fraction of the time!

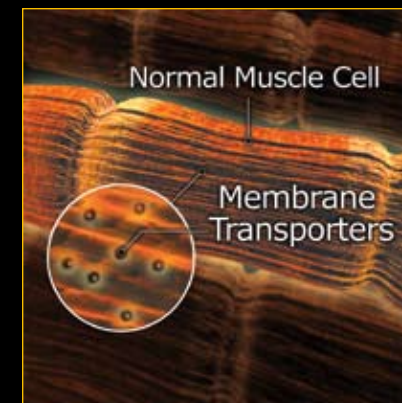

Two-time Mr. Olympia Jay Cutler knows how important it is for any bodybuilder to get on a musclebuilding micronutrient multivitamin complex. That's why he's chosen *Anabolic VITAKIC* to pack on more muscle than ever before!

ENHANCED MUSCLE GROWTH WITH ANABOLIC VITAKIC

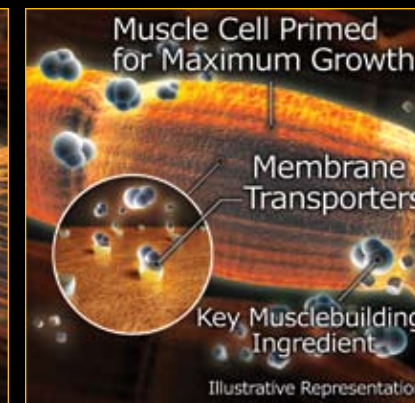

Anabolic VITAKIC™ contains an advanced musclebuilding component that is driven into muscle cells starting with your very first serving.

STEP 1 Pre-Anabolic VITAKIC Consumption

The *Anabolic VITAKIC* Nanomolecular Multi-Action Rapid-Release Caplets release a specific driver of muscle growth.

STEP 2 Post-Anabolic VITAKIC Consumption
