

HOW JAY WILL GET IT BACK

On September 27th, 2008, Team MuscleTech Superstar Jay Cutler placed second to Dexter Jackson at the Mr. Olympia. But all that's in the past. And now, with new determination, Jay has fixed his sights firmly on the 2009 Olympia with a plan of attack that includes a powerful new micronutrient multivitamin system that will be a powerful addition to his musclebuilding arsenal.

SPECIAL 4-PAGE AD REPORT

Jay hasn't turned his back on the Mr. Olympia title. He's fighting back with everything he has in his arsenal: hard work, a new attitude and help from a powerful new musclebuilding supplement developed by Team MuscleTech™ researchers.

At the 2008 Mr. Olympia, Jay Cutler may have lost the battle, but certainly not the war. You see, Jay is used to hard work, having started out in the concrete construction business when he was 11. He knows what it's like to build something from the ground up, tear it down and then build it back bigger and stronger than ever before. And, just as he learned from his childhood, he's pouring the foundation of muscle that will rival and conquer anything it comes in contact with, including Dexter Jackson.

Now Jay's not going it alone. To make sure he has everything he needs to come back bigger and stronger than ever, he has enlisted the help of Team MuscleTech™

researchers and a new supplement that will be a powerful addition to his musclebuilding arsenal so he can move one step closer to becoming something that can't be beat – by anyone. This state-of-the art product is called Anabolic VITAKIC™. Within the sleek yellow graphics of the label lies a potent anabolic combination of over 100 micronutrients, powerful antioxidants, amino acids, coenzymes, trace elements and essential vitamins and minerals to go along with a powerful musclebuilding agent that will shock his muscles into a state of massive growth!

Anabolic VITAKIC™ is something extraordinary. It represents the end of a time when hardcore bodybuilders, like Jay, have to settle for a mass-market multivitamin

SPECIAL 4-PAGE AD REPORT

The Sandow statue may have changed hands, but the feeling of being Mr. Olympia is still Jay Cutler's. And he knows that size is still king. That's why he'll continue packing it on with Anabolic VITAKIC™ – the world's most hardcore musclebuilding micronutrient multivitamin complex.

that fails to deliver results that bodybuilders want. This is the real thing. Everything about Anabolic VITAKIC™ is designed for bodybuilders who only care about one thing – packing on as much freaky muscle as humanly possible. And that suits Jay just fine. As much

as the judges are honoring size and symmetry, size is still everything. Team MuscleTech™ researchers have known this for years and have, in secret, been perfecting the World's Most Hardcore Musclebuilding Micronutrient Multivitamin Complex – Anabolic VITAKIC. The key to the

A precise portion of a key anabolically charged musclebuilding compound in Anabolic VITAKIC is nanoparticulated for lightning-fast delivery!

Why Anabolic VITAKIC Kicks the Hell out of Mass-Market Multivitamins

Industry-leading Team MuscleTech™ researchers have equipped the Anabolic VITAKIC formula with a key musclebuilding agent that targets intramuscular processes to quickly drive up muscle growth and strength! That's right! Not only will your body be supplied with micronutrients with Anabolic VITAKIC, but it forces you to build more muscle! There's yet another reason why Anabolic VITAKIC is superior.

A carefully calculated dose of this powerful key ingredient is treated with Team MuscleTech's pharmaceutically inspired nanoparticulation technology so that it's hyper-shuttled to your muscles where it can exert its powerful musclebuilding effects. As far as bodybuilders like Jay Cutler are concerned, Anabolic VITAKIC's hardcore musclebuilding micronutrient multivitamin complex has literally made regular mass-market multivitamins obsolete!!

power of this revolutionary formula is its powerful musclebuilding agent that has an uncanny ability to target intramuscular processes to quickly drive up muscle growth and strength. At the same time, the micronutrient complex in Anabolic VITAKIC makes sure all your specific micronutrient needs are covered!

JAY'S SECRET WEAPON

Jay Cutler has promised us that he will once again hold the Mr. Olympia title. But he's got a long road until he'll get to prove it in September of 2009. Three-hour blood-and-guts training sessions will create the basis of what will be Jay Cutler's best bodybuilding package. But to thrive and grow from that kind of training, he'll require serious supplementation. That's why Team MuscleTech™ researchers have super-charged every dose of Anabolic VITAKIC™ with a potent, anabolic ingredient to help maximize muscle growth and strength.

ANABOLIC VITAKIC BREAKS THE MOLD

Creating a supplement potent enough for Jay's comeback was no easy task. Jay is a big bodybuilder. So how do we help make him bigger? Better yet, how do we biomedically engineer a supplement that could help make any bodybuilder bigger? That kind of challenge could only be tackled with years of research collaboration by the most innovative minds in the industry of nutraceutical science. Industry-leading researchers

There's nobody that trains harder than Jay Cutler. The bioengineered musclebuilding agent in Anabolic VITAKIC™ helps to ensure that his muscle growth is taken to the next level.

from Team MuscleTech™ made the Anabolic VITAKIC™ formula so cutting-edge it's protected by seven U.S. patents! In fact, Anabolic VITAKIC is engineered with specific blends that lend to its overwhelming effectiveness. The first of three blends in Anabolic VITAKIC is Anabolic Catalyst. Featuring an exclusive technology, a precise portion of a proven driver of muscle growth is engineered to be shuttled to your muscles fast. Next, Vita-Muscle and Essential Growth are comprised of micronutrients and other ingredients. Now your muscles will be exposed to an environment perfect for building raw muscle. That's why mass-market multivitamins just can't stack up to the awesome musclebuilding power of the World's Most Hardcore Musclebuilding Micronutrient Multivitamin Complex – Anabolic VITAKIC!

Engineered for bodybuilders, Anabolic VITAKIC is a potent anabolic combination of over 100 micronutrients, powerful antioxidants, amino acids, coenzymes, trace elements and essential vitamins and minerals!

ANABOLIC VITAKIC – THE NEXT GENERATION OF SUPPLEMENTATION

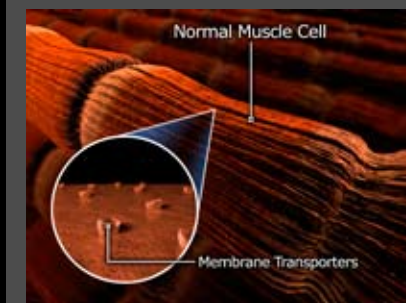

Today's bodybuilder needs more than just good genetics to build the kind of freaky muscle needed to win titles. Science is the secret to dramatically increasing your muscle mass and strength in the shortest amount of time, and Team MuscleTech™ scientists have known this for years. That's how they're able to produce the most demanded, state-of-the-art sports supplements in the world for professional bodybuilders! But not only are IFBB pro champions like Jay Cutler, Dexter Jackson, Gustavo

Enhanced Muscle Growth with Anabolic VITAKIC

Anabolic VITAKIC™ contains an advanced musclebuilding component that is driven into muscle cells starting with your very first serving.

STEP 1
