1000% ANABOLIC GOES HARDCORE!

Team MuscleTech™ researchers were determined to create a product that would trigger the mechanisms needed for unrelenting muscle growth right down to the biomolecular level, without androgenic manipulation or side effects. Their tireless efforts led to the creation of the LEUKIC® Hardcore formula – the World's First 100% Anabolic Compound. By activating the enzymatic complex responsible for transmitting the body's most powerful anabolic signal, LEUKIC Hardcore achieves what every bodybuilder craves – unmatched anabolism for massive gains in dense, high-quality muscle. Groundbreaking research has shown that test subjects who trained and took a key component in LEUKIC Hardcore forced 350% more anabolic signal

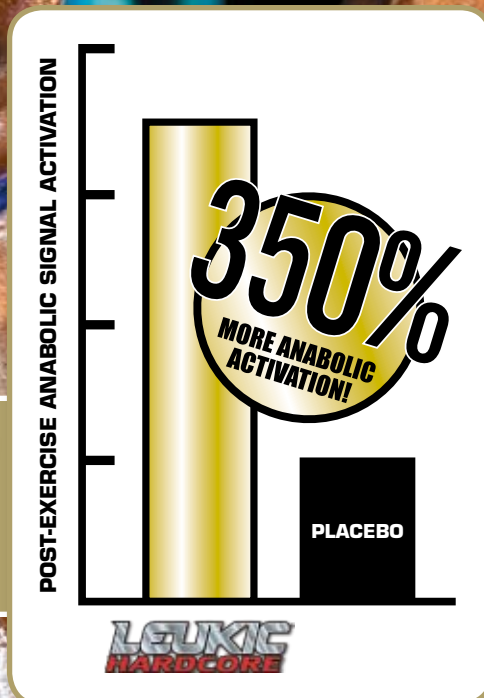

activation at the muscle fiber level than when taking a placebo! This key component also has the unique ability to stimulate protein synthesis in skeletal muscle as published in a prestigious journal. What's more, a key molecular structure within LEUKIC Hardcore has been scientifically shown to increase training-induced growth hormone levels by an incredible 106% after just one pre-workout serving! This groundbreaking science confirms the amazing anabolic power of LEUKIC Hardcore. LEUKIC® Hardcore is truly the most hardcore, 100% anabolic compound legally available!

- ✓ World's #1 Selling Anabolic Activator!
- ✓ Test Subjects Increased Anabolic Signal Activation by 350%!
- ✓ Scientific Study Shows a 106% Increase in GH!
- ✓ Zero Negative Androgenic Side Effects!

Key Ingredient in LEUKIC Hardcore VS. Placebo

In a randomized order, double-blind, crossover test, subjects who trained and took the key ingredient in LEUKIC® Hardcore forced 350% more anabolic signal activation at the muscle fiber level than when taking a placebo.
